

Patil Srishanth
Roll No.: PES2UG23AM070
Bachelor of Technology- CSE(AI & ML)
PES University, Bengaluru

+91-9980330535
srishanthp007@hotmail.com

Education

.Bachelor of Technology in Computer Science and Engineering(AI & ML) 2023-27
PES University, Bengaluru CGPA: 8.01

Technical Skills

Pyhon Technologies
Data Processing:NumPy, Pandas, Apache Airflow, Dask, Spark
Web Service:Flask, FastAPI, Django, Rest, Soap, JSON
Data Visualization:Matplotlib, Seaborn, Plotly
Artificial Intelligence and Machine Learning
ML and Deep Learning:TensorFlow, Keras , PyTorch, scikit-learn
NLP: Word2Vec, GloVe, Transformer models (BERT, GPT, T5), text classification, NER, text-to-X, LLMs
Computer Vision:OpenCV, Pillow, and Albumentations, ResNet, YOLO, EfficientNet
Prompting Technologies:Chain of Thought (CoT), LLM Judge, LLMLingua, AdaFlow
AI Tools:Claude AI, Microsoft CoPilot, Preplexity, Google AI Studio
Cloud Platform:S3, EC2
Tools/Technologies:Jenkins, Docker, Kubernetes, GitHub
Database Technologies:Postgres, MySQL, MongoDB

Projects

. **Multimodal F1 RAG: Technical & Regulatory Reasoning Engine**
Technology: Python, LangChain, Gemini 1.5 Flash, ChromaDB, Unstructured, RAGAS

–**Developed** a production-grade Multimodal RAG pipeline to perform complex reasoning over unstructured FIA technical regulations using an automated ETL workflow. – **Engineered** a Multi-Vector Indexing strategy to partition text, tables, and diagrams, utilizing Vision-LLM summaries as semantic hooks for high-resolution visual assets. – **Integrated** a Hybrid Search and Cross-Encoder Re-ranking layer to mitigate domain-specific hallucinations and ensure engineering-grade precision in final synthesis. – **Validated** architectural robustness through the RAGAS framework, providing empirical metrics on faithfulness and context relevance for technical compliance queries.

. **Sentinel Social: Privacy & Risk Management System**
Technology: Java 21, Virtual Threads (Project Loom), Jackson, NLP, JUnit

– **Architected** a high-performance risk management system in Java to audit digital footprints for PII leaks and professional reputation risks using GDPR-compliant archives. – **Optimized** large-scale JSON data parsing by leveraging Java 21 Virtual Threads, ensuring a high-concurrency, "Privacy-First" approach with zero external API dependencies. – **Implemented** modular analysis rubrics via the Strategy and Chain of Responsibility design patterns to decouple toxicity detection and professional sentiment auditing. – **Engineered** a scalable data-processing pipeline that maintains 100% data sovereignty, providing a secure solution for modern reputation management and privacy auditing.

Achievements and Certifications

•Python for Data Science, AI & Development IBM via Coursera	Nov 2025
– Mastered Python fundamentals and libraries including Pandas, Numpy, and Matplotlib.	
•Python for Data Science NPTEL (Elite Medalist)	Aug 2025
– Completed rigorous academic training in algorithmic problem-solving using Python.	
•Intro to Machine Learning Kaggle	
– Hands-on experience in building predictive models using Scikit-Learn.	
	Dec 2025
